DBA Support Analyst

Microsoft Corporation -  Redmond, WA -

July 2016 to Present

Client Description:
Microsoft Corporation is an American public multinational corporation headquartered in Redmond, Washington, USA that develops, manufactures, licenses, and supports a wide range of products and services predominantly related to computing through its various product divisions.

Environment:
Microsoft has E2E development and production environment of more than 25000 servers and applications. We are responsible for pro-active monitoring of all the servers and their jobs using monitoring tools to reduce critical business impact by alerting respective peer teams. Microsoft Service Enterprise an ITSM tools are used for ticketing and SharePoint portal is used to store all technical and process documentation.

Roles and Responsibilities:
• Responsible for Database support, troubleshooting, planning and migration. Resource planning and coordination for application migrations with project managers, application and web app teams. Project involved guidance and adherence to standardized procedures for planned data center consolidation for worldwide centers using in-house corporate and third party applications based on SQL 2000 in upgrade project to SQL 2005.

- Monitoring of database size and disk space in Production, Staging & Development environments
- Performed installation of SQL Enterprise 2005 64bit version on Windows 2003 servers on Enterprise systems of clustered and standalone servers in enterprise Data Centers. Patch applications.
- Failover cluster testing and resolution on HP servers as well as monitoring and backup reporting setup with Microsoft Operations Manager and backup teams.
- Working in Microsoft production environment which includes applications and servers.
- Configured Transactional Replication and Log Shipping with SQL Server Management Studio as well as basic account management and troubleshooting with connectivity, security and firewall issues.
- Handling issues related to Server Availability, Performance.
- Performed Production support and on Call duties
- Conducted Performance Tuning using SQL Profiler and Windows Performance Monitor.
- Worked with various business groups while developing their applications, assisting in database design, installing SQL Server clients, phasing from development to QA and to Production environment.

Microsoft Corporation -

November 2014 to July 2016

Client Description:

❖  Costco Wholesale Corporation operates an international chain of membership warehouses, mainly under the "Costco Wholesale" name, that carry quality, brand name merchandise at substantially lower prices than are typically found at conventional wholesale or retail sources. The warehouses are designed to help small-to-medium-sized businesses reduce costs in purchasing for resale and for everyday business use. Individuals may also purchase for their personal needs.

❖  Responsibilities:

➢  Performed server installation and configurations for SQL Server 2005 and SQL Server 2000.

➢  Performed installation of SQL Server Service Packs

➢  Upgraded databases from SQL Server 2000 to SQL Server 2005.

➢  Scheduled Full and Transactional log backups for the user created and system databases in the production environment using the Database Maintenance Plan Wizard.

➢  Setup backup and restoration jobs for development and QA environments

➢  Created transactional replication for the reporting applications.

➢  Implemented disaster recovery solution at the remote site for the production databases using Log Shipping.

➢ Used System monitor to find the bottlenecks in CPU, Disk I/O and memory devices and improved the database server performance.

➢ Used SQL Server Profiler to monitor and record database activities of particular users and applications.

➢ Used DBCC commands to troubleshoot issues related to database consistency

➢ Worked with various business groups while developing their applications, assisting in database design, installing SQL Server clients, phasing from development to QA and to Production environment
